EDUCATION

Thadomal Shahani Engineering College
B.E. Computer Engineering

2021 - 2024
CGPA: 9.65

Thakur Polytechnic
Diploma in Computer Engineering

2018 - 2021
CGPA: 9.63

PROJECTS

Track-It Attendance Tracker 🔗

April 2022

HTML, CSS, Python, EasyOCR, OpenCV

- Track-It is a web application developed in python using OCR technology for teachers to scan physical attendance sheets and save them as digital files. Track-It helps tracking attendance of the students with ease and doesn't require any technical knowledge about any subject for the teachers to use it.
- The user interface of the website is very minimal too making it simple to use. Teachers just need to scan and upload the attendance sheet's picture and Track-It will do it's job of converting the image into a csv file. Teachers can then download the csv file and save it to their device to further track students' attendance.

B.A.E - Breast Cancer Awareness and Examine 🔗

March 2022

HTML, CSS, JavaScript, Python

- B.A.E is a Breast Cancer Awareness website, whose main goal is to make early detection of breast cancer possible for every women, and provide them with a platform to be able to talk about it, and not loose hope in the darkest of times.
- Our website offers features such as a questionnaire for women to fill out about their daily habits and health to determine the risk for cancer, a cancer prediction model for women, an online support forum to ask questions about breast cancer, self examination of breast cancer symptoms, music and chatbot for listening to calming music and reading faqs.

United Listing 🔗

July 2021

HTML, CSS, JavaScript, PHP, BootStrap, MySQL

- Web application with responsive UI built for local small business owners to list their businesses in order to reach more people. Often small businesses do not have their own websites and customers miss out on the local sellers. It helps in strengthening the local economy.

- With the help of United Listing, sellers can register their businesses and list it under various categories. Registration process is quick and takes only a few minutes to complete. Customers on the other hand can browse through a list of businesses according to their needs by filtering out the categories. They can directly contact the sellers from our website if needed.

INTERNSHIP

DiscoveryAdmin

June - July 2022

Website Designer & Manager, US

I designed a complete website with over 50 dynamic pages using CMS tools. The purpose of the website was to help automate the process of long running meetings with clients to solve their queries. The website consists of 50+ articles that answer questions previously asked by businesses. I helped the team manage and edit the website content real time without affecting the user interface of the website. I also made illustrations and graphics for the website which made it look more interactive.

Child Rights and You (CRY)

May - August 2020

Crowdfunding Intern, Mumbai

Learnt and implemented digital marketing strategies while actively raising awareness about the most vulnerable families and children from the effects of the COVID-19 pandemic on social media platforms such as Facebook and LinkedIn.
